

What a Wonderful World

In our topic this term, we will be exploring our beautiful Kentish coastline. We hope to spend some time by the beach on a trip! (More information to come). We will be focusing on learning about the geographical features of our coast line and learning about the water cycle.

We will be diving in to an art project based on local artist, Ann Palmer. The background of the newsletter is one of her paintings! Isn't she talented? See if you can find out anything about her or find one of her local exhibitions to visit.

In maths this term we will be focusing on multiplication and division. Don't forget to keep practising those times tables at home so we can be ready for our check in June. We will be learning formal methods for solving these calculations. We will then move on to learning about length and perimeter, exploring 2D shapes and how to solve problems about them. Finally, we will focus on fractions and decimals. Knowing your timestables will really help you with this!

In writing we hope to create some beautiful Haiku poems at the beginning of the term. We will link these with our coast line theme and publish them in a creative way. We will then be moving on to a persuasive letter about how to keep our coast line clean to protect the creatures who live there. After that, it will be time for a biography. We will look at David Attenborough for inspiration and other artists then invent our own biography.
