

Home Learning - Term 6

Due Friday 8th July 2022

This term we will be learning about the needs of animals, including their sources of food and habitats as well as how plants grow and what they need to thrive.

Create a fact file about an animal. You could do this by writing, drawing pictures or creating a video. If you create a video please send it digitally to your class teacher.

Visit the woods, a nature reserve or a local garden centre to observe the plants. Do you notice different types? Are some big, small, different colours and shapes?

You might like to draw or take a photograph of what you see?

Try this animal classification game online.

<https://www.sheppardsoftware.com/science/animals/games/animal-characteristics/b>

Create an animal mask using your own ideas, remember to try and match the colours correctly and think of a way to make it wearable.

Can you write about your time in Reception? Your grown-up could scribe this for you if you have lots of memories or ideas to share

Can you remember what you felt like when you first started school?

Who have been your friends and why? What are your favourite things we have learnt about?

What are your favourite memories?

What is exciting you about Year One?

Use the words for life website for ideas on supporting your child's Communication and Language development.
